

How to Make Extra Armour for Warhammer 40,000 Rhino: Ten Cent Tutorials

Are you looking for a way to make your Warhammer 40,000 Rhino tank even more durable? With these Ten Cent Tutorials, you can easily and cheaply add extra armour to your Rhino, making it more resistant to enemy fire.

Materials:

How To Make Extra Armour for a Warhammer 40000 Rhino (Ten Cent Tutorials Book 1)

★★★★☆ 4 out of 5

Language : English

File size : 332 KB

- 10 cents (or equivalent in other currency)
- Plasticard
- Super glue
- Hobby knife
- Ruler
- Pencil

Instructions:

1. Cut a piece of plasticard to the desired size and shape for the extra armour. I used a piece that was 2"x4" for the front of the Rhino.
2. Score the plasticard along the edges where you want to bend it. This will help to prevent the plasticard from cracking when you bend it.
3. Bend the plasticard to the desired shape. I bent the plasticard in a "U" shape to fit over the front of the Rhino.
4. Apply super glue to the edges of the plasticard and attach it to the Rhino. Make sure to press firmly and hold the plasticard in place until the glue dries.
5. Repeat steps 1-4 for any other areas of the Rhino that you want to add extra armour to.

Tips:

- You can use different thicknesses of plasticard to create different levels of protection. Thicker plasticard will be more durable, but it will also be more difficult to bend.
- You can use different shapes of plasticard to create different effects. For example, you could use a rectangular piece of plasticard to create a simple armour plate, or you could use a more complex shape to create a more ornate design.
- You can add other details to the extra armour, such as rivets, bolts, or spikes. This will help to make the extra armour look more realistic and interesting.

:

With these Ten Cent Tutorials, you can easily and cheaply add extra armour to your Warhammer 40,000 Rhino tank. This extra armour will help to protect your Rhino from enemy fire, making it more likely to survive on the battlefield.

Bonus:

If you want to make your extra armour even more durable, you can coat it with a layer of sealant. This will help to protect the plasticard from scratches and wear and tear.

You can also use different colours of plasticard to create different effects. For example, you could use black plasticard to create a more sinister looking Rhino, or you could use red plasticard to create a more eye-catching Rhino.

With a little bit of creativity, you can use these Ten Cent Tutorials to create a unique and personalised Rhino tank that will be the envy of your opponents.

So what are you waiting for? Get started today and make your Rhino tank even more durable!
